Reasons for allowance

1. Applicant's arguments filed 5/6/05, with respect to U.S Patent No. 6,690,219 have been fully considered and are persuasive. The rejection has been withdrawn.

2. The following is an examiner's statement of reasons for allowance:

The present invention is drawn to a device for generating a delay signal utilizing a plurality of source signals, a source signal generator, a source signal selector and a logic operator recited in claims 1-6 and 8-32. None of the prior art disclosed or suggested to show the particular structure and/or the particular operation recited in these claims namely: the combination of all method steps as recited in claims 1 and 32; "the source signal selector ... in response to a first and second clock signals as a first and a second clock signals as a first and a second output signals" and "a logic operator... to obtain said delay signal" in combination with "the source signal generator" as recited in claim 16.

The new prior art reference cited on PTO-892 is for interest and documentation purposes only. The same reasons as noted above, the Kong et al (U.S Patent No. 6,696,897) lacks the combination of all method steps as recited in claims 1 and 32; "the source signal selector ... in response to a first and second clock signals as a first and a second clock signals as a first and a second output signals" and "a logic operator... to obtain said delay signal" in combination with "the source signal generator" as recited in claim 16.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
